Professional Summary:

Highly experienced Web Application Developer with a strong Computer Science background, specializing in **Laravel** and Full Stack web development. I possess a proven track record in **designing and developing complex and diverse systems**, including a comprehensive company accounts management system that led to a significant increase in productivity and efficiency. My expertise extends to building **innovative applications and websites** such as "Wasla" (an ads and product platform with home delivery and e-payment), "Hasel" (a project support platform), "Vendors Manager" (an institutional resource management system), and "Jaleesa" (a babysitting service app). I demonstrate a strong ability to lead development teams, solve complex technical problems, and contribute to impactful projects. I am seeking to join a dynamic and innovative company to leverage my web development and leadership skills.

Work Experience:

- **February 2025 – until now:**

BDC – Web Application Developer (Laravel Developer):

- Contributed to the development and re-engineering of several advanced systems using Laravel, directly impacting the delivery of diverse services and solutions.
- Developed the "Wasla" application, specialized in user-posted product advertisements and peer-to-peer purchasing, integrating home delivery functionalities and electronic payment options.
- Worked on developing the "Hasel" website, a project support platform enabling users to publish their projects for funding from various sponsors.
- Participated in building the "Vendors Manager" system for institutional resource management, contributing to improved operational efficiency for organizations.
- Contributed to the development of the "Jaleesa" application, a specialized app for facilitating requests and dispatching babysitters.

- **September 2023 – July 2024:**

Tapro Tec - Website Developer (Team Leader - Full Stack Web Developer):

- Developed and managed a comprehensive company accounts management system using Laravel, which **reduced report generation time from 2-3 days to the same day**, significantly improving operational efficiency.
- Facilitated shipment tracking and financial operations management, **significantly reducing errors and accelerating processes**, especially for tracking shipments between Countries, making the process instant and effortless.
- Led a team of up to 5 web developers in an Agile environment, ensuring timely project delivery and meeting client needs.
- Designed efficient databases using MySQL and integrated them with back-end interfaces; built APIs for integration with external services.
- Optimized application performance and security to ensure a smooth user experience.
- Managed and executed web projects from start to launch, coordinating with design and development teams.

Educational Information:

2015 – 2020: Bachelor in Computer Science (Honors) College of Computer Science and Information Technology - University of Holy Quran and Islamic Science.
2011 – 2014: Beit Al-Mal Secondary School

Technical Skills:

- **Programming Languages:** PHP, Kotlin, JS.
- **Frameworks:** Laravel, NodeJS, NextJS.
- **Databases:** MySQL, PostgreSQL.
- **Version Control Tools:** Git, GitHub, Docker.
- **Other Concepts:** System Analysis & Design (ERD, UML), Networking, MS Office, deployment.

Personal Skills:

- **Team Leadership & Project Management:** Ability to guide and motivate development teams (including leading teams of up to 5 developers) and manage projects effectively to ensure on-time delivery.
- **Problem-Solving & Critical Thinking:** Proven skill in resolving complex technical problems and analyzing situations to provide innovative and effective solutions.
- **Effective Communication & Collaboration:** Excellent ability to communicate clearly, build strong working relationships, and work effectively within a team or independently to achieve common goals.
- **Flexibility & Adaptability:** Capacity to adapt to changing work environments and perform well under pressure, with strong attention to detail and accuracy.
- **Task Organization & Time Management:** Proficient in prioritizing tasks and organizing workflow to increase productivity and efficiency.

Training and Courses:

- Joomla Framework Course - via YouTube (2024)
- Laravel Training Course - via YouTube (2023)
- WordPress Framework Course - via YouTube (2021)
- Basics of Networking – Noursin Training Center – 2018
- Diploma in Computer Science – UVESCO National Education Network – 2015

Language Information:

- **Arabic Language:** Mother Tongue.
- **English Language:** Very Good (reading, writing, and understanding).
